## FOR IMMEDIATE RELEASE

Effective June 1, 2018, RIGGING INNOVATIONS INC will begin production of its MOJO MARD system as a factory option on the CURV and CPX harness and container systems and as a standard component of the Telesis 4.0 systems. Once production begins on new systems, it will be available as a retrofit to all previous CURV, CPX, and Telesis 3.0 systems.

The retrofit requires no modification to the harness and container system and all that is needed is a new reserve freebag with the MOJO release installed and a MOJO RSL. Retrofit parts will be available from RI dealers on or before July 1, 2018.

The price as a factory option or as retrofit parts will be US\$295.00 complete.

Any questions may be addressed to [info@rigginginnovations.com](mailto:info@rigginginnovations.com).

Sandy R. Reid  
President
